

Lubrication

Oil lubrication

Oil quality

Name	Lubricating oil CLP46 DIN 51517 or HD 20W/20 SAE
Symbol acc. DIN 51502	
Kinematic viscosity at 40 °C	46 ±4 mm ² /s
Flash point (acc. to Cleveland)	+175 °C
Setting point (Pourpoint)	-15 °C
Application temperature *)	higher than permitted bearing temperature

*) For ambient temperatures under -10 °C an other suitable type of lubrication oil must be used.
Request required.

Grease lubrication

Quality of grease lubricant ...

... corresponding to NLGI GRADE 2
